

Schluter® - DIADEC

Schluter®-DIADEC is an anodized aluminum finishing and edge-protection profile for outside corners of tiled surfaces. The reveal of the profile forms a 45° beveled edge.

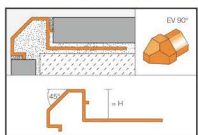

Features a 45° beveled edge

Prevents tile edges from chipping

Integrated joint spacer establishes a defined uniform joint cavity between the tile and the profile

Outside corner accessory can be used with any size of the DIADEC profile

Available in various finishes of anodized aluminum

2.13 Schluter®-DIADEC
