

ramp+tec™ ZRR

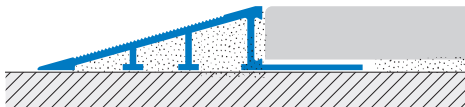

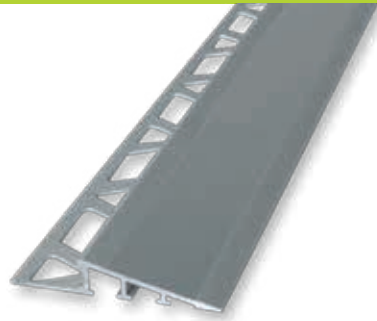

**RAMPTEC ZRR** profile in anodised aluminium has been conceived to join floors at different heights.

The ramp angle of elevation of 20° allows to connect smoothly uneven adjoining floor levels for a safe transit.

The vertical edge has the dovetail internal cavity for a better mechanical fixing for both grout and adhesive, in the major intensive load points.

Illustrated scale dimension 1:1  
(ZRR 100\*)

**RAMPTEC ZRR-AS Silver Anodised Aluminium**

This profile has a silver coating and is suitable for both indoor or outdoor application with high tolerance to weather agents. Profile suitable also for car transit.
